## **Certified Module**

Partner: AVPro Edge Models: MXNet

PARAMETERS:		
Command_Processor_ID	The unique identifier of the command processor module that this module registers with.	
Video Wall Name	The unique name for the video wall.	
Layout Type	The type of layout. Possible values include:	

## **Certified Module**

Partner: AVPro Edge Models: MXNet

CONTROL:		
Layout_Name	S	Text value specifies the name of the layout to recall.
Layout_Recall	D	Pulse to recall the layout specified by the <b>Layout_Name</b> serial input.

## **Certified Module**

Partner: AVPro Edge Models: MXNet

FEEDBACK:		
ls_Initialized	D	Digital high indicates this module has been initialized with the command processor module.
Last_Recalled_Layout	s	Text value indicates the name of the last layout recalled.

TECTING.	
TESTING:	
	VC4 v4.0000.00007
OPS USED FOR TESTING:	CP4 v2.8001.00086.01
	CP3 v1.8001.0214.01
SIMPL WINDOWS USED FOR TESTING:	4.2500.04
CRES DB USED FOR TESTING:	219.0500.001.00
DEVICE DATABASE:	200.28000.002.00
SYMBOL LIBRARY USED FOR TESTING:	1191
SAMPLE PROGRAM:	AVPro Edge MXNet v2.6 Demo.smw
	v1.0 – Initial Release
	v1.1 – Fixed SerialPort transmitted and received data.
	<ul> <li>Made updates to allow a Wallplate Encoder to initialize with this suite.</li> </ul>
	v1.2 – Isolated serial communication queue to provide device control responsiveness.
	<ul> <li>Corrected unsolicited data parsing impacting hotplug detected and resolution.</li> </ul>
	v2.0 – Added "Offline" functionality.
REVISION HISTORY:	<ul> <li>Polling will happen more frequently but will only poll for one component's states at a time. This prevents serial control from getting backed up behind a global system poll.</li> </ul>
	v2.1 – Added volume support for applicable 10G decoders.
	<ul> <li>Added support for 10G videowall support with "10G VW Layout"</li> </ul>
	v2.2 - Change 1G video wall input select to new faster API command
	v2.3 – Added CEC support for Encoders.
	v2.4 – Added Matrix PresetRecall and Matrix Macro module.
	V2.5 – Added preview urls to the encoder module.
	v2.6 – Reconnect time increased from 30 seconds to 90 seconds.
