

Model:E2

GENERAL INFORMATION				
SIMPLWINDOWS NAME:	Barco E2			
CATEGORY:	Screen Management System			
VERSION:	1.01			
SUMMARY:	Control of the E2 device.			
GENERAL NOTES:	This module is used to control an E2 via TCP/IP. The ports used are 9876 & 9999. After connecting, the module will automatically retrieve the list of sources, destinations, backgrounds, presets & stills.			
CRESTRON HARDWARE REQUIRED:	3-Series controller.			
SETUP OF CRESTRON HARDWARE:	TCP/IP: Fill in the IP address of the E2 as parameter.			
VENDOR FIRMWARE:	E2 V5.2			
VENDOR SETUP:	Install and configure E2			
CABLE DIAGRAM:	None			

CONTROL:		
Signal/Function Name	<u>D,S,A</u>	Digital, Serial, Analog signal property definition.
connect	D	High to connect on port 9876, to receive notifications.
powerOn	D	Pulse to turn on E2 via Wake-On-LAN.
LogCommunication	D	Flag to log communication to and from E2
queueScreenDestChanges	D	Pulse to enable queueing of the following actions: activateSource activateSourceOnLeftside activateSourceOnRightside activateSourceOnTop

Model:E2

		activateSourceOnBottom activateSourceFullScreen activateSourceTopLeftAligned activateSourceTopRightAligned activateSourceBottomLeftAligned activateSourceBottomRightAligned activateSourceBottomRightAligned removeSource (only for screen destinations) activateBackground removeBackground
commitScreenDestChanges	D	Pulse to execute the queued changes with one command per destination.
getFrameInfo	D	Pulse to retrieve the configuration of the device.
getSources	D	Pulse to retrieve the list of sources.
activateSource	D	Pulse to activate a source on the selected screen destination on position x , y . The source is positioned in the area with width $\&$ height, the alignment is set with the source Alignment signal.
activateSourceOnLeftside	D	Pulse to activate the selected source on the left half side of the selected screen destination.
activateSourceOnRightside	D	Pulse to activate the selected source on the right half side of the selected screen destination.
activateSourceOnTop	D	Pulse to activate the selected source on top half of the selected screen destination.
activateSourceOnBottom	D	Pulse to activate the selected source on bottom half of the selected screen destination.
activateSourceFullScreen	D	Pulse to activate the selected source full screen of the selected screen destination.
activateSourceTopLeftAligned	D	Pulse to activate the selected source on the top left part of the selected screen destination.
activateSourceTopRightAligned	D	Pulse to activate the selected source on the top right part of the selected screen destination.
activateSourceBottomLeftAligned	D	Pulse to activate the selected source on the bottom left part of the selected screen destination.
activateSourceBottomRightAligned	D	Pulse to activate the selected source on the bottom right part of the selected screen destination.
activateSourceOnAuxDestination	D	Pulse to activate the selected source on the selected aux destination.

Model:E2

removeSource D Pulse to remove the selected source from the selected aux or screen destination. If reezeSource D Pulse to infreeze the selected source on the selected aux or screen destination. unfreezeSource D Pulse to unfreeze the selected source on the selected aux or screen destination. Pulse to enable 3D on the selected source. disableSource3D D Pulse to enable 3D on the selected source. disableSourceLettAligned D Pulse to activate the selected source on the left part of the selected screen destination. (using PercentageWidthForCornerPIP) activateSourceRightAligned D Pulse to activate the selected source on the left part of the selected screen destination. (using PercentageWidthForCornerPIP) activateSourceTopAligned D Pulse to activate the selected source on the right part of the selected screen destination. (using PercentageWidthForCornerPIP) activateSourceBottomAligned D Pulse to activate the selected source on the popart of the selected screen destination. (using PercentageHeightForCornerPIP) iSourceID A This is the source ID. XPos A This is the source ID. XPos A This is the source ID. Width A This is the vertical position to be used with activateSource. Width A This is the vertical position to be used with activateSource. This is the height of the area to be used with activateSource. This is the height of the area to be used with activateSource. This is the height of the area to be used with activateSource. This is the height ToPE = 0, ALIGNMENT_EFT = 1, ALIGNMENT_EFT = 1, ALIGNMENT_EFT = 2, ALIGNMENT_EFT = 2, ALIGNMENT_BOTTOM = 8. PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource-Aligned functions. SelectSource_# D Pulse to select a source.			
unfreezeSource D Pulse to unfreeze the selected source on the selected aux or screen destination. Pulse to enable 3D on the selected source. D Pulse to disable 3D on the selected source. D Pulse to disable 3D on the selected source. D Pulse to activate the selected source on the left part of the selected screen destination. (using PercentageWidthForCornerPIP) activateSourceRightAlligned D Pulse to activate the selected source on the right part of the selected screen destination. (using PercentageWidthForCornerPIP) Pulse to activate the selected source on the top part of the selected screen destination. (using PercentageHeightForCornerPIP) activateSourceTopAligned D Pulse to activate the selected source on the top part of the selected screen destination. (using PercentageHeightForCornerPIP) Believe to activate the selected source on the top part of the selected screen destination. (using PercentageHeightForCornerPIP) A This is the selected source on the bottom part of the selected screen destination. (using PercentageHeightForCornerPIP) A This is the source ID. XPos A This is the source ID. XPos A This is the horizontal position to be used with activateSource. Width A This is the vertical position to be used with activateSource. This is the alignment to be used with activateSource. This is the alignment to be used with activateSource. This is the alignment to be used with activateSource. This is the alignment to be used with activateSource. This is an a combination of following values: ALIGNMENT_CENTER = 0, ALIGNMENT_LET = 1, ALIGNMENT_BOTTOM = 8, PercentageWidthForCornerPIP A This is the percentage of the destination width used for the ActivateSource-Aligned functions.	removeSource	D	Pulse to remove the selected source from the selected aux or screen destination.
enableSource3D D Pulse to enable 3D on the selected source. disableSource3D D Pulse to disable 3D on the selected source. activateSourceLeftAligned D Pulse to activate the selected source on the left part of the selected screen destination. (using PercentageWidthForCornerPIP) activateSourceRightAligned D Pulse to activate the selected source on the right part of the selected screen destination. (using PercentageWidthForCornerPIP) activateSourceTopAligned D Pulse to activate the selected source on the top part of the selected screen destination. (using PercentageHeightForCornerPIP) activateSourceBottomAligned D Pulse to activate the selected source on the top part of the selected screen destination. (using PercentageHeightForCornerPIP) activateSourceBottomAligned D Pulse to activate the selected source on the bottom part of the selected screen destination. (using PercentageHeightForCornerPIP) XPos A This is the source ID. XPos A This is the vertical position to be used with activateSource. Width A This is the vertical position to be used with activateSource. Width A This is the width of the area to be used with activateSource. This is the alignment to be used with activateSource. This can a combination of following values: ALIGNMENT_CENTER = 0, ALIGNMENT_LEFT = 1, ALIGNMENT_BOTTOM = 8, PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource- Aligned functions.	freezeSource	D	Pulse to freeze the selected source on the selected aux or screen destination.
D Pulse to disable 3D on the selected source.	unfreezeSource	D	Pulse to unfreeze the selected source on the selected aux or screen destination.
activateSourceLeftAligned Define to activate the selected source on the left part of the selected screen destination. (using PercentageWidthForCornerPIP) Define to activate the selected source on the right part of the selected screen destination. (using PercentageWidthForCornerPIP) Define to activate the selected source on the top part of the selected screen destination. (using PercentageWidthForCornerPIP) Define to activate the selected source on the top part of the selected screen destination. (using PercentageHeightForCornerPIP) Define to activate the selected source on the bottom part of the selected screen destination. (using PercentageHeightForCornerPIP) Define to activate the selected source on the bottom part of the selected screen destination. (using PercentageHeightForCornerPIP) ISourceID A This is the source ID. XPos A This is the source ID. XPos A This is the vertical position to be used with activateSource. Width A This is the width of the area to be used with activateSource. Width A This is the width of the area to be used with activateSource. This is the alignment to be used with activateSource. This can a combination of following values: ALIGNMENT_CENTER = 0, ALIGNMENT_ECHTER = 0, ALIGNMENT_ECHTER = 2, ALIGNMENT_ECHTER = 2, ALIGNMENT_TOP = 4, ALIGNMENT_TOP = 4, ALIGNMENT_BOTTOM = 8, This is the percentage of the destination height used for the ActivateSource-Aligned functions. This is the percentage of the destination width used for the ActivateSource-Aligned functions.	enableSource3D	D	Pulse to enable 3D on the selected source.
destination. (using PercentageWidthForCornerPIP) activateSourceRightAligned D Pulse to activate the selected source on the right part of the selected screen destination. (using PercentageWidthForCornerPIP) activateSourceTopAligned D Pulse to activate the selected source on the top part of the selected screen destination. (using PercentageHeightForCornerPIP) activateSourceBottomAligned D Pulse to activate the selected source on the bottom part of the selected screen destination. (using PercentageHeightForCornerPIP) ISourceID A This is the source ID. XPos A This is the horizontal position to be used with activateSource. YPos A This is the vertical position to be used with activateSource. Width A This is the width of the area to be used with activateSource. This is the alignment to be used with activateSource. This is the alignment to be used with activateSource. This can a combination of following values: ALIGNMENT_CENTER = 0, ALIGNMENT_CENTER = 0, ALIGNMENT_EFT = 1, ALIGNMENT_TOP = 4, ALIGNMENT_BOTTOM = 8, PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource-Aligned functions. PercentageWidthForCornerPIP A This is the percentage of the destination width used for the ActivateSource-Aligned functions.	disableSource3D	D	Pulse to disable 3D on the selected source.
destination. (using PercentageWidthForCornerPIP) activateSourceTopAligned Description of the selected source on the top part of the selected screen destination. (using PercentageHeightForCornerPIP) activateSourceBottomAligned Description of the selected source on the bottom part of the selected screen destination. (using PercentageHeightForCornerPIP) ISourceID A This is the source ID. XPos A This is the source ID. XPos A This is the vertical position to be used with activateSource. Width A This is the vertical position to be used with activateSource. Width A This is the height of the area to be used with activateSource. This is the height of the area to be used with activateSource. This is the alignment to be used with activateSource. This can a combination of following values: ALIGNMENT_CENTER = 0, ALIGNMENT_LEFT = 1, ALIGNMENT_LEFT = 1, ALIGNMENT_TOP = 4, ALIGNMENT_TOP = 4, ALIGNMENT_TOP = 4, ALIGNMENT_BOTTOM = 8, PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource-Aligned functions.	activateSourceLeftAligned	D	
destination. (using PercentageHeightForCornerPIP) activateSourceBottomAligned D Pulse to activate the selected source on the bottom part of the selected screen destination. (using PercentageHeightForCornerPIP) ISourceID A This is the source ID. XPos A This is the horizontal position to be used with activateSource. YPos A This is the vertical position to be used with activateSource. Width A This is the width of the area to be used with activateSource. Height A This is the height of the area to be used with activateSource. This is the alignment to be used with activateSource. This can a combination of following values: ALIGNMENT_CENTER = 0, ALIGNMENT_EFT = 1, ALIGNMENT_EFT = 2, ALIGNMENT_TOP = 4, ALIGNMENT_BOTTOM = 8, PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource- Aligned functions.	activateSourceRightAligned	D	
destination. (using PercentageHeightForCornerPIP) iSourceID A This is the source ID. XPos A This is the horizontal position to be used with activateSource. YPos A This is the vertical position to be used with activateSource. Width A This is the width of the area to be used with activateSource. Height A This is the height of the area to be used with activateSource. This is the alignment to be used with activateSource. This can a combination of following values: ALIGNMENT_CENTER = 0, ALIGNMENT_LEFT = 1, ALIGNMENT_LEFT = 1, ALIGNMENT_TOP = 4, ALIGNMENT_TOP = 4, ALIGNMENT_BOTTOM = 8, PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource-Aligned functions.	activateSourceTopAligned	D	Pulse to activate the selected source on the top part of the selected screen destination. (using PercentageHeightForCornerPIP)
XPos A This is the horizontal position to be used with activateSource. YPos A This is the vertical position to be used with activateSource. Width A This is the width of the area to be used with activateSource. Height A This is the height of the area to be used with activateSource. This is the alignment to be used with activateSource. This can a combination of following values: ALIGNMENT_CENTER = 0, ALIGNMENT_LEFT = 1, ALIGNMENT_RIGHT = 2, ALIGNMENT_TOP = 4, ALIGNMENT_TOP = 4, ALIGNMENT_BOTTOM = 8, PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource-Aligned functions. PercentageWidthForCornerPIP A This is the percentage of the destination width used for the ActivateSource-Aligned functions.	activateSourceBottomAligned	D	
YPos A This is the vertical position to be used with activateSource. Width A This is the width of the area to be used with activateSource. Height A This is the height of the area to be used with activateSource. This is the alignment to be used with activateSource. This can a combination of following values: ALIGNMENT_CENTER = 0, ALIGNMENT_LEFT = 1, ALIGNMENT_RIGHT = 2, ALIGNMENT_RIGHT = 2, ALIGNMENT_TOP = 4, ALIGNMENT_BOTTOM = 8, PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource-Aligned functions. PercentageWidthForCornerPIP A This is the percentage of the destination width used for the ActivateSource-Aligned functions.	iSourceID	Α	This is the source ID.
Width A This is the width of the area to be used with activateSource. Height A This is the height of the area to be used with activateSource. This is the alignment to be used with activateSource. This can a combination of following values: ALIGNMENT_CENTER = 0, A LIGNMENT_LEFT = 1, ALIGNMENT_RIGHT = 2, ALIGNMENT_TOP = 4, ALIGNMENT_TOP = 4, ALIGNMENT_BOTTOM = 8, PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource-Aligned functions. PercentageWidthForCornerPIP A This is the percentage of the destination width used for the ActivateSource-Aligned functions.	XPos	Α	This is the horizontal position to be used with activateSource.
Height A This is the height of the area to be used with activateSource. This is the alignment to be used with activateSource. This can a combination of following values: ALIGNMENT_CENTER = 0, A LIGNMENT_LEFT = 1, ALIGNMENT_RIGHT = 2, ALIGNMENT_TOP = 4, ALIGNMENT_BOTTOM = 8, PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource-Aligned functions. This is the percentage of the destination width used for the ActivateSource-Aligned functions.	YPos	Α	This is the vertical position to be used with activateSource.
This is the alignment to be used with activateSource. This can a combination of following values: ALIGNMENT_CENTER = 0, ALIGNMENT_LEFT = 1, ALIGNMENT_RIGHT = 2, ALIGNMENT_TOP = 4, ALIGNMENT_BOTTOM = 8, PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource-Aligned functions. This is the percentage of the destination width used for the ActivateSource-Aligned functions.	Width	Α	This is the width of the area to be used with activateSource.
This can a combination of following values: ALIGNMENT_CENTER = 0, A LIGNMENT_LEFT = 1, ALIGNMENT_RIGHT = 2, ALIGNMENT_TOP = 4, ALIGNMENT_BOTTOM = 8, PercentageHeightForCornerPIP A This is the percentage of the destination height used for the ActivateSource-Aligned functions. PercentageWidthForCornerPIP A This is the percentage of the destination width used for the ActivateSource-Aligned functions.	Height	Α	This is the height of the area to be used with activateSource.
Aligned functions. PercentageWidthForCornerPIP A This is the percentage of the destination width used for the ActivateSource-Aligned functions.	SourceAlignment	Α	This can a combination of following values : ALIGNMENT_CENTER = 0, ALIGNMENT_LEFT = 1, ALIGNMENT_RIGHT = 2, ALIGNMENT_TOP = 4,
Aligned functions.	PercentageHeightForCornerPIP	Α	
selectSource_# D Pulse to select a source.	PercentageWidthForCornerPIP	Α	
	selectSource_#	D	Pulse to select a source.

Model:E2

getBackgrounds	D	Pulse to retrieve the list of backgrounds.
activateBackground	D	Pulse to activate the selected background on the selected screen destination.
removeBackground	D	Pulse to remove the background from the selected screen destination.
freezeBackground	D	Pulse to freeze the background on the selected screen destination.
unfreezeBackground	D	Pulse to unfreeze the background on the selected screen destination.
iBackgroundID	Α	This is the background ID.
selectBackground_#	D	Pulse to select a background.
getDestinations	D	Pulse to retrieve the list of destinations.
freezeDestination	D	Pulse to freeze the selected destination.
unfreezeDestination	D	Pulse to unfreeze the selected destination.
iDestinationID	Α	This is the destination ID.
iDestinationType	Α	This is the destination type ID.
selectDestination_#	D	Pulse to select a destination.
iLayerID	Α	This is the layer ID.
selectLayer_#	D	Pulse to select a layer.
getPresets	D	Pulse to retrieve the list of presets.
activatePreset	D	Pulse to activate the selected preset.
savePreset	D	Pulse to save the selected preset.
saveAsNewPreset	D	Pulse to save as a new preset.
deletePreset	D	Pulse to delete the selected preset.
renamePreset	D	Pulse to rename the selected preset
iPresetID	Α	This is the preset ID.
NewPresetName\$	S	The preset name to be used with SaveAsNewPreset

Model:E2

selectPreset_#	D	Pulse to select a preset.
getContentForDestinations	D	Pulse to retrieve the current content for all destinations.
getStills	D	Pulse to retrieve the list of stills.
takeStillSource	D	Pulse to take a still of a source
takeStillBackground	D	Pulse to delete a still of a background.
deleteStill	D	Pulse to delete a still.
iStillID	Α	This is the still ID.
selectStill_#	D	Pulse to select a still

FEEDBACK:		
Connected	D	High when connected on port 9876.
NotificationReceived	D	High to indicate a change occurred on the device.
FrameName\$	S	Serial signal containing the name of the device.
FrameType\$	S	Serial signal containing the type (E2/S3).
FrameVersion\$	S	Serial signal containing the version number of the firmware.
FrameOSVersion\$	S	Serial signal containing the version number of the OS.
FramelPAddress\$	S	Serial signal containing the IP address.
FrameMACAddress\$	S	Serial signal containing the MAC address.
NumSources	Α	Indicates the number of sources.
oSourceID	Α	Indicates the source ID of the selected source.
SourceType	Α	Indicates the source type ID of the selected source.
SourceFrozen	D	High to indicate if the selected source is frozen.

Model:E2

SourceCapacity	Α	Indicates the capacity of the selected source. Values: 1=SL, 2=DL, 4=4K.
SourceWidth	Α	Indicates the width of the selected source.
SourceHeight	Α	Indicates the height of the selected source.
SourceName\$	S	Serial signal containing the source name of the selected source.
SourceStillName\$	S	Serial signal containing the source still name of the selected source.
SelectedSource_#	D	High to indicate the selected source.
SourceFrozen_#	D	High to indicate if the selected source is frozen.
SourceType_#	Α	Indicates the source type ID for all sources
SourceWidth_#	Α	Indicates the source width for all sources
SourceHeight_#	Α	Indicates the source height for all sources
SourceCapacity_#	Α	Indicates the capacity for all sources. Values: 1=SL, 2=DL, 4=4K.
SourceName\$_#	S	Serial signal containing the names of all sources.
SourceStillName\$_#	S	Serial signal containing the names of the stills of all sources.
NumBackgrounds	Α	Indicates the number of backgrounds.
oBackgroundID	Α	Indicates the background ID of the selected background.
BackgroundType	Α	Indicates the background type ID of the selected background.
BackgroundFrozen	D	High to indicate if the selected background is frozen.
BackgroundHeight	Α	Indicates the height of the selected background.
BackgroundWidth	Α	Indicates the width of the selected background.
BackgroundCapacity	Α	Indicates the capacity of the selected background. Values: 1=SL, 2=DL, 4=4K.
BackgroundName\$	S	Serial signal indicating the background name of the selected background.
SelectedBackground_#	D	High to indicate the selected background.
BackgroundFrozen_#	D	High to indicate if the selected background is frozen.

Model:E2

BackgroundType_#	Α	Indicates the background type for all backgrounds.
BackgroundWidth_#	Α	Indicates the background width for all backgrounds.
BackgroundHeight_#	Α	Indicates the background height for all backgrounds.
BackgroundCapacity_#	Α	Indicates the background capacity for all backgrounds. Values: 1=SL, 2=DL, 4=4K.
BackgroundName\$_#	S	Serial signal containing the names of all backgrounds.
NumDestinations	Α	Indicates the number of destinations.
oDestinationID	Α	Indicates the destination ID of the selected destination.
oDestinationType	Α	Indicates the destination type ID of the selected destination.
DestinationHeight	Α	Indicates the height of the selected destination.
DestinationWidth	Α	Indicates the width of the selected destination.
DestinationNumLayers	Α	Indicates the number of available layers on the selected destination.
DestinationFrozen	D	High to indicate if the selected destination is frozen.
DestinationName\$	S	Serial signal containing the name of the selected destination.
SelectedDestination_#	D	High to indicate the selected destination.
DestinationType_#	Α	Indicates the destination type of all destinations.
DestinationFrozen_#	D	High to indicate which destinations are frozen.
NumLayers_#	Α	Serial signal containing the number of layers for each destination.
DestinationWidth_#	Α	Indicates the width of all destinations.
DestinationHeight_#	Α	Indicates the height of all destinations.
DestinationName\$_#	S	Serial signal containing the destination name of all destinations.
oLayerID	Α	Indicates the layer ID of the selected layer for a selected destination.
WindowSourceName\$	S	Serial signal containing the source name of the source on the selected destination & layer.
WindowSourceHeight	Α	Indicates the height of the source on the selected destination & layer.

Model:E2

WindowSourceWidth	Α	Indicates the width of the source on the selected destination & layer.
WindowSourceXPos	Α	Indicates the horizontal position of the source on the selected destination & layer.
WindowSourceYPos	Α	Indicates the vertical position of the source on the selected destination & layer.
WindowSourceStillName\$	S	Serial signal containing the source still name of the source on the selected destination & layer.
oLayerCapacity	Α	Indicates the capacity of selected destination & layer. Values: 1=SL, 2=DL, 4=4K.
WindowSourceFrozen	D	High to indicate if the source on the selected destination & layer is frozen.
WindowSourceID	Α	Indicates the Window Source ID
SelectedLayer_#	D	High to indicate the selected layer on the selected destination.
NumPresets	Α	Indicates the number of presets.
oPresetID	Α	Indicates the preset ID of the selected preset.
PresetName\$	S	Serial signal containing the name of the preset.
SelectedPreset_#	D	High to indicate the selected preset.
PresetName\$_#	S	Serial signal containing the names of all presets.
LayerID_##	Α	Indicates the layer ID of all layers for the first 8 destinations.
LayerCapacity_##	Α	Indicates the layer capacity of all layers for the first 8 destinations. Values: 1=SL, 2=DL, 4=4K.
WindowWidth_##	Α	Indicates the width of the sources on all layers for the first 8 destinations.
WindowHeight_##	Α	Indicates the height of the sources on all layers for the first 8 destinations.
WindowXPos_##	Α	Indicates the horizontal position of the sources on all layers for the first 8 destinations.
WindowYPos_##	Α	Indicates the vertical position of the sources on all layers for the first 8 destinations.
WindowSourceID_##	Α	Indicates the source ID of the sources on all layers for the first 8 destinations.
BackgroundSourceID_#	Α	Indicates the background ID of all destinations.
WindowSourceName\$_##	s	Serial signal containing the names of the sources on all layers for the first 8 destinations.

Model:E2

WindowSourceStillName\$_##	S	Serial signal containing the source still names of the sources on all layers for the first 8 destinations.
BackgroundSourceName\$_#	S	Serial signal containing the background name on all destinations.
NumStills	Α	Indicates the number of stills.
oStillID	Α	Indicates the still ID.
StillName\$	S	Serial signal containing the name of the selected still.
StillHeight	Α	Indicates the height of the selected still.
StillWidth	Α	Indicates the width of the selected still.
StillURL\$	S	Serial signal containing the URL of the selected still.
SelectedStill#	D	High to indicate the selected still.
StillWidth_#	Α	Indicates the width of all stills.
StillHeight_#	Α	Indicates the height of all stills.
StillName\$_#	S	Serial signal containing the name of all selected still.
StillURL\$_#	S	Serial signal containing the URL of all selected still.

Model:E2

PARAMETERS:		
IP-Address	Р	IP address of the device.

TESTING:	
OPS USED FOR TESTING:	1.503.0016
SIMPL WINDOWS USED FOR TESTING:	4.09.04
DEVICE DB USED FOR TESTING:	93.00.002.00
CRESTRON DB USED FOR TESTING:	67.05.006.00
SYMBOL LIBRARY USED FOR TESTING:	508
SAMPLE PROGRAM:	Barco E2 Demo V1.01
REVISION HISTORY:	V. 1.0 – Original Release V. 1.01 GetPresets fixed (for E2 versions starting with V5.1 or higher). Show all layers (program+preview) Added enable/disable3D functions. Added some extra ActivateSource functions.
