GENERAL INFORMATION

SIMPLWINDOWS NAME:	Somfy Tahoma v1.1 Motor Control
CATEGORY:	Smart Home
VERSION:	1.1
SUMMARY:	This module controls most motor-based devices.
GENERAL NOTES:	<p>This module is used to control a variety of motor-based devices such as motorized shades. The programmer will need to acquire the Target ID of the device to be controlled. This can be found in the Third Party Integration section of the app.</p> <p>Certain device types may or may not support all controls/feedback. For instance, RTS devices are stateless and therefore will not support the direct position control or provide any feedback.</p> <p>Certain device info is available regardless of the device, such as device type. This can be used to help the user or programmer understand when certain controls/feedback will be available.</p>
CRESTRON HARDWARE REQUIRED:	3 Series processor only
VENDOR FIRMWARE:	1.0.12

Partner: Somfy
Model: TaHoma
Device Type: Smart Box
